

Making the World Friction Free

DS-100 Premium Diesel Fuel Additive

SAVES FUEL COSTS

Certified 10 SAE J1231 TMC/SAE

Puts money in your pocket after treatment costs.

Vehicles see 1.9 % to 3.0 % savings in fuel consumption.

Fuel costs according to sae j1231 tmc/sae fuel consumption test procedure type II.

Typically the savings on yearly purchase of 5000 litres would be \$60.00.

Average truck operates at 4-5 MPG (City) and 6-7 MPG (highway) which translates to \$.05 / mile savings after conditioner costs.

ONE DRUM TREATS 210,00 GALLONS OR 945,000 LITRES

BENEFITS:

-  Cost effective fuel treatment.
-  Competitively priced.
-  Improve engine performance.
-  Longer lasting interior life.
-  Fuel costs.
